

KEENCUT

THE WORLD'S FINEST CUTTING MACHINES

LARGE FORMAT CUTTER

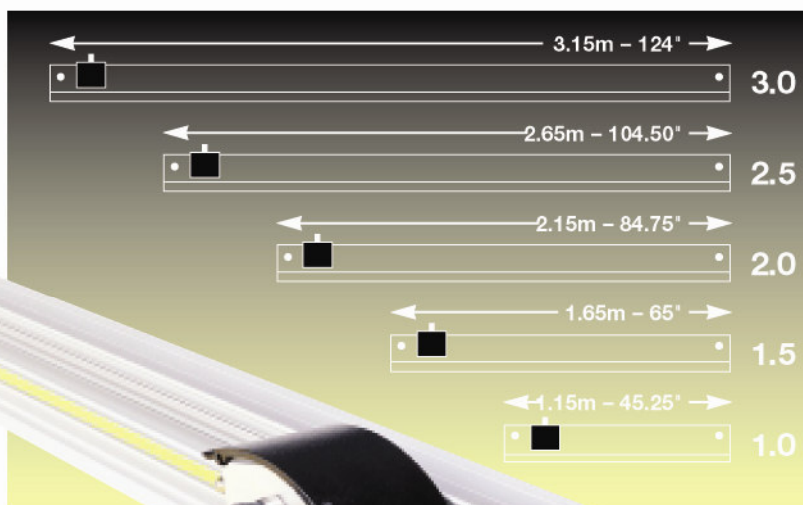

*Essential equipment for
every Graphics studio
and Signmaking
workshop*

The Javelin is an ingenious cutting solution which offers a standard of straight, square and clean cutting that is impossible to achieve with a craft knife and straight edge. The unique design of the Javelin enables its straightness to be factory adjusted, using laser technology, to meet with today's very high standards for accurate butt joints on sectional panels and pop-up systems. Additional built in features of the Javelin have created an indispensable precision cutter that is safe for both product and people.

Using the Javelin alone or with the BIG bench could not be easier, just place the cutter bar on the material to be cut, align it with the image registration or crop marks, depress the cutting head and push or pull it along to cut. A safe and simple no-nonsense precision cutter requiring no special skills. Whether used alone as a moveable cutting bar or in conjunction with the Keencut BIG bench to create a superb cutting table the Javelin is truly in a class of its own. A safe, simple, extreme precision cutter requiring no special skills the Javelin was specifically designed to cut large format graphics, pop ups, signs, plastic panels and much more.

The patented linear bearings have been test run under load for 1600 km (1000 miles) with the result that they are guaranteed for 20 years.

The Javelin cutter bar is fitted with two full length rubber strips on the underside that grip tenaciously to any surface without marking.

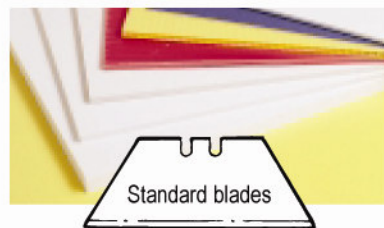

Ideal for cutting

- PVC Foamboard up to 6mm (.25") thick
- Foam centred board up to 10mm (.40") thick
- Honeycomb and corrugated plastics
- Vinyl and plastic film
- Cardboard
- Corrugated cardboard

Guarantees

- 5 year comprehensive guarantee
- 20 year free replacement guarantee on all bearings
- 30 day, no quiback guarantee

Standard blades

Standard inexpensive blades can be changed in seconds with no tools.

■ Guaranteed straight and accurate to within 0.2mm (0.008") over the full length of cut. Where less extreme accuracy is required, the Javelin is the best choice.
